

# Breeze

## COMMERCIAL AUTO RATER

### QUOTE ACCURACY IS A BREEZE!

When a submission reaches the Summary screen in Breeze, there are some simple checks that can go a long way to ensure pricing accuracy:

1. Make sure an insurance score is being applied on the quote.
2. If Breeze shows "Insurance Score Unavailable", that may be because the name or driver information is entered incorrectly. Breeze allows you to edit this information and re-order by making changes to the Primary Officer.
3. Verify MVR's were ordered and applied for all drivers. Breeze will display when MVR's are ordered and applied. If the driver's MVR was a "No-Hit", the license information can be edited to re-order the report.

The screenshot shows the Breeze interface with a sidebar on the left and a main content area. The sidebar includes sections for Business, Customer, Vehicles, Drivers (highlighted with a '3'), Coverage, and Summary. The main content area is divided into Customer, Drivers, and Vehicles sections. In the Customer section, 'Insurance Score Unavailable' is highlighted with a '1'. In the Drivers section, 'Primary Officer Name' is highlighted with a '2'. The Drivers list shows 'Testy' and 'Test'.

Which change would you like to make to the Primary Officer?

- Correct or edit the current name
- Correct or edit the current address
- Use a new name and address

The screenshot shows a table of drivers with columns for Name, Birth Date, License State, License Number, and MVR Status. The MVR Status column is highlighted with a box, showing 'Clear' and 'No-Hit' options. There are also edit and delete icons for each driver row.
